

St Blasius Academy Design and Technology Curriculum overview

Intent

It is our intention that Design and Technology at St Blasius inspires children through a broad range of practical experiences to create innovative designs which solve real and relevant problems within a variety of different contexts. This iterative process will encourage children to identify real and relevant problems, critically evaluate existing products and then take risks and innovate when designing and creating solutions to the problems. As part of the iterative process, time is built in to reflect, evaluate and improve on prototypes using design criteria throughout to support this process. Opportunities are provided for children to evaluate key events and individuals who have helped shape the world, showing the real impact of design and technology on the wider environment and helping to inspire children to become the next generation of innovators.

Implementation

Through a variety of creative and practical activities, we teach the knowledge, understanding and skills needed to engage in the process of designing and making. Key skills and knowledge for DT have been mapped across the school to ensure clear progression through the year groups. Key concepts and technical vocabulary are also included in planning which follows an overall design, make, evaluate structure. DT should be taught to a high standard, where each of the stages should be given equal weight. The key skills we teach the children are:

- Sewing and textiles
- Cooking and nutrition
- Electrical and mechanical components
- Using materials

Units on nutrition are taught ensuring that children have a growing understanding of where food comes from, its seasonality and the need for a healthy and varied diet.

Impact

The impact of the teaching of Design and Technology is assessed in a number of ways across St Blasius. Formal assessment from book looks and marking of children's work is used alongside more informal child interviews and photographic and video evidence. Children will have the opportunity across units to self and peer assess their work using success criteria grids, and written feedback. We want to ensure that Design and Technology is loved by teachers and pupils across school, therefore encouraging them to want to continue building on this wealth of skills and understanding, now and in the future.

	Autumn	Spring	Summer
Year 1	Construction <u>Fabric Faces</u>	Construction <u>Pirate Paddy's Packed Lunch Problems</u>	Cooking and Nutrition Seaside snacks
Year 2	Construction <u>Moving Pictures Traditional Tales</u>	Construction <u>Fabric Bunting</u>	Cooking and Nutrition <u>Fruit and Veg Smoothies</u>
Year 3	Construction <u>Juggling Balls</u>	Construction <u>Roman Shields and Mosaics</u>	Cooking and Nutrition Italian food (pizza & pasta)
Year 4	Construction <u>Let's Go Fly a Kite</u>	Construction Moving cars (electricity STEM)	Cooking and Nutrition <u>The Great Bread Off</u>
Year 5	Construction	Construction	Cooking and Nutrition

	Marbulous Structures	Felt Phone Cases	Global Food
Year 6	Construction Sewing (poppies)	Construction Automata Animals	Cooking and Nutrition Super Seasonal Cooking

Early Years Foundation Stage
(Early learning goals linked to Design and Technology)

During the EYFS, the learning environment, adult-led activities and child initiated activities will be planned and supported to encourage progress in Design and Technology. Children at the expected level of development will be able to:

- Handle equipment and tools effectively, including pencils for writing.
- Safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function.
- Use what they have learnt about media and materials in original ways, thinking about uses and purposes. They represent their own ideas, thoughts and feelings through design and technology, art, music, dance, role play and stories.
